

# Are false fire alarms annoying you?

Help achieve ZERO false alarms!  
The major causes of false fire alarms are:

## UNATTENDED COOKING

Smoke emission from unattended cooking is the number one cause of false fire alarms. Please pay close attention when cooking and turn off the cooker when you leave home.

## CARELESS SMOKING

Smoking in areas installed with smoke detectors will also set off fire alarm. Only smoke in open areas.

## MATCHES AND INCENSE STICKS

Unattended or careless use of matches, candles and incense sticks in your home can set off the fire alarm, or worse still, cause a real fire.

## BARBEQUING

Barbequing causes lots of smoke. This method of cooking within your property, including your balcony, is against the Community Rules.
